

## Maintenance contract

### Application

AFRISO offers comprehensive maintenance contracts with different terms for the flue gas analysers BLUELYZER, EUROLYZER, MULTILYZER and MAXILYZER as well as the dust measuring instrument. In addition to a complete function test and a device calibration, annual service includes an inspection and, if necessary, replacement of the O<sub>2</sub> and CO measuring cells. The basic maintenance contract can be extended to cover additional measuring cells.

To be able to benefit from the full scope of the maintenance contract, you must close the maintenance contract for the complete term (5 or 7 years) with annual maintenance intervals immediately after purchasing the flue gas analyser. Maintenance must be performed regularly at the specified intervals of max. 11 to 13 months.

### Versions

Maintenance contract	Term		Device calibration	Function test	Replacement of cells						Part no.
	5 years	7 years			O <sub>2</sub> cell	CO cell	NO cell	NO <sub>2</sub> cell	CO <sub>high</sub> cell	SO <sub>2</sub> cell	
BLUELYZER ST	•		•	•	•	•					579041
EUROLYZER STx		•	•	•	•	•					579047
MULTILYZER STe		•	•	•	•	•					579044
Dust measuring instrument STM 225	•		•	•	•	•					579046
Additional cell NO term as device								•			579000
Additional cell NO <sub>2</sub>									•		579001
